

NHS staff and health care professionals

We would like to take this opportunity to thank all NHS, healthcare and social care professionals who are on the frontline of the fight against coronavirus. We appreciate the sterling work you are doing to help heal the sick and keep the rest of us safe. If you are a healthcare professional we invite you to get in touch with us if there is anything we can do to help you at this time.

Thanks also to those keeping other vital services going at this time, your efforts are making a critical and positive difference.

Staying up to date

We aim to keep regular updated with the latest information and the action we are taking day-to-day on our website. We are also sign-posting, where applicable, residents to the wealth of official information available on official website including:

- www.gov.uk
- www.nhs.uk

As a leadership team we are ensuring that our staff are informed and supported. Staff have been provided with equipment to enable them to work remotely, we're using a range of internal channels to deliver messaging and staff are receiving guidance to help them support direct reports and I am proud of the way in which everyone at WESTWAY has adapted to situation.
